

Deployment of Environmental Monitoring Equipment (Amended)

NOTICE IS HEREBY GIVEN that for the period of roughly one month from the **29th June – 31st July**, environmental monitoring equipment will be deployed in the vicinity of Hythe Pier (as marked by the red box in Figure 1). **Approximated position: 50° 52' 26.428" N, 001° 23' 29.787" W.**

The monitoring equipment will sit around 0.5m from the seabed and will be tethered to a buoy on the surface to ensure visibility. The buoy itself is fitted with a ~~fixed white light~~ **yellow light that will flash once every two seconds** and will have **yellow floats** around the edge to aid both daytime and nighttime navigation, **as shown in figure 2.**

This notice will be self-cancelling once monitoring period has passed and buoy has been recovered

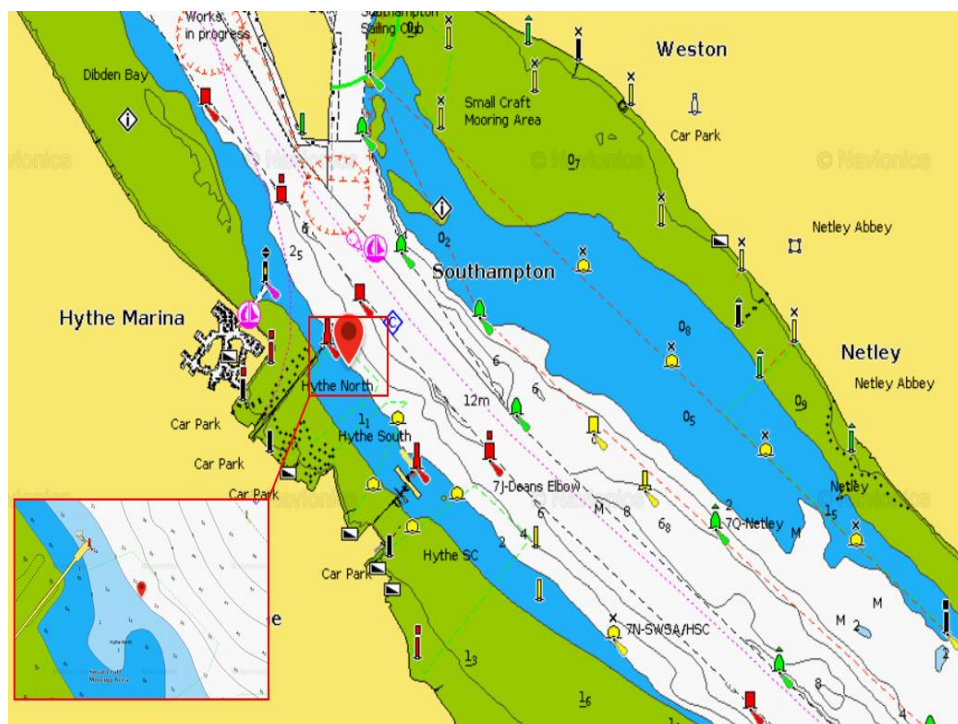

Figure 1: Red box marks the vicinity in which the monitors will be deployed onto the seabed and marked with a yellow buoy.

Figure 2: Current setup as buoy is on station.

This notice will be self-cancelling once monitoring period has passed and buoy has been recovered

**Steven Masters,
Harbour Master**
